SECTION 2: Valuation Results for the University of California Retirement Plan

A. MEMBER DATA

The Actuarial Valuation and Review considers the number and demographics of covered members, including active members, vested terminated members, retired members, disabled members and beneficiaries.

This section presents a summary of significant statistical data on these participant groups.

More detailed information for this valuation year and the preceding valuation can be found in Section 3, Exhibits A and B.

CHART 1

Member Population: 1997 – 2006

A historical perspective of how the participant population has changed over the past ten valuations can be seen in this chart.

Year Beginning July 1	Active Members	Terminated Vested Members*	Retired Members, Disabled Members and Beneficiaries	Ratio of Retirees to Actives
1997	93,404	28,778	29,659	0.32
1998	93,363	21,998	30,346	0.33
1999	98,123	22,109	31,242	0.32
2000	103,382	21,950	32,770	0.32
2001	109,848	23,278	34,684	0.32
2002	117,776	25,198	36,165	0.31
2003	121,351	31,262	37,867	0.31
2004	123,717	39,874	39,738	0.32
2005	124,642	47,123	41,477	0.33
2006	122,317	52,548	45,442	0.37

* Includes terminated nonvested members due a refund of member contributions or CAP balance payment.

SECTION 2: Valuation Results for the University of California Retirement Plan

Active Members

Plan costs and liabilities are affected by the age, service credit and compensation of active members. In this year's valuation, there are 122,317 active members with an average age of 44.2 years, average service credit of 9.3 years and average compensation of \$67,521.

Inactive Members

In this year's valuation, there were 52,548 terminated members. Within this group of terminated members there are 25,570 members with a vested right to a deferred or immediate vested monthly benefit and 26,978 terminated nonvested members who are entitled to a return of their member contributions or a distribution of their CAP balance.

These graphs show a distribution of active members by age and by service credit. In Chart 3 there are 115 members who have 40 or more years of service credit.

CHART 2
Distribution of Active Members by Age as of July 1, 2006

CHART 3
Distribution of Active Members by Service Credit as of July 1, 2006

SECTION 2: Valuation Results for the University of California Retirement Plan

Retired Members, Disabled Members and Beneficiaries

As of July 1, 2006, 37,289 retired members, 2,269 disabled members and 5,884 beneficiaries were receiving total monthly benefits of \$108,233,046.

These graphs show a distribution of the current retired members, disabled members and beneficiaries based on their monthly benefit and age.

CHART 4

Distribution of Retired Members, Disabled Members and Beneficiaries by Monthly Benefit as of July 1, 2006

CHART 5

Distribution of Retired Members, Disabled Members and Beneficiaries by Age as of July 1, 2006

SECTION 2: Valuation Results for the University of California Retirement Plan

B. FINANCIAL INFORMATION

Retirement plan funding anticipates that, over the long term, both net contributions (less administration expenses) and net investment earnings (less investment fees) will be needed to cover benefit payments.

Retirement plan assets change as a result of the net impact of these income and expense components. Additional financial information for UCRP, including a summary of these transactions for the valuation year, is presented in Section 3, Exhibits D and E.

It is desirable to have level and predictable plan costs from one year to the next. For this reason, the Regents have approved an asset valuation method for UCRP that smoothes market value investment gains and losses over a five-year period. Under this valuation method, the full value of market fluctuations is not recognized in a single year and, as a result, the asset value and the plan costs are more stable.

The chart shows the determination of the actuarial value of assets as of the valuation date.

CHART 6

Determination of Actuarial Value of Assets for Year Ended June 30, 2006

			(\$ in 000s)
1. Market value of assets			\$43,362,224
2. Calculation of unrecognized return*	<u>Amount*</u>	<u>Unrecognized Return**</u>	
(a) Year ended June 30, 2006	(\$106,416)	(\$85,133)	
(b) Year ended June 30, 2005	1,062,517	637,510	
(c) Year ended June 30, 2004	2,420,256	968,102	
(d) Year ended June 30, 2003	(653,657)	(130,731)	
(e) Year ended June 30, 2002	<u>(6,340,338)</u>	<u>0</u>	
(f) Total unrecognized return			1,389,748
3. Actuarial value of assets: (1) - (2f)			<u>41,972,476</u>
4. Actuarial value as a percentage of market value: (3) ÷ (1)			96.8%

* Total return minus expected return on a market value basis

** Recognition at 20% per year over 5 years

SECTION 2: Valuation Results for the University of California Retirement Plan

Both the actuarial value and market value of assets are representations of the Plan's financial status. As investment gains and losses are gradually taken into account, the actuarial value of assets tracks the market value of assets. The actuarial value of assets is significant because UCRP's liabilities are compared to the actuarial value of assets to determine what portion, if any, remains unfunded. Amortization of any unfunded liability may become an important element in determining future contribution rates.

This chart shows the change in the actuarial value of assets versus the market value over the past six years.

CHART 7

Actuarial Value of Assets vs. Market Value of Assets for Years Ended June 30, 2001 – 2006

SECTION 2: Valuation Results for the University of California Retirement Plan

C. ACTUARIAL EXPERIENCE

To calculate contribution rates, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year actual experience is measured against the assumptions. If overall experience is more favorable than anticipated (an actuarial gain), the contribution rate will decrease from the previous year. On the other hand, the contribution rate will increase if overall actuarial experience is less favorable than expected (an actuarial loss).

Taking account of experience gains or losses in one year without making a change in assumptions reflects the belief that the single year's experience was a short-term

development and that, over the long term, experience will return to the original assumptions. For contribution rates to remain stable, assumptions should approximate experience.

If assumptions are changed, the contribution rate is adjusted to take into account a change in experience anticipated for all future years.

The components of the total loss of \$1.1 billion are shown below. The net experience loss from sources other than investments was 1.1% of the expected actuarial accrued liability. A discussion of the major components of the actuarial experience is on the following pages.

This chart provides a summary of the actuarial experience during the past year.

CHART 8
Actuarial Experience for Year Ended June 30, 2006

	(\$ in 000s)
1. Net (loss) from investments*	(\$665,579)
2. Net (loss) from salary increases greater than assumed	(392,978)
3. Net (loss) from other experience	<u>(48,598)</u>
4. Net experience (loss): (1) + (2) + (3)	(\$1,107,155)

* Details in Chart 9

SECTION 2: Valuation Results for the University of California Retirement Plan

Investment Rate of Return

A major component of projected asset growth is the assumed rate of return. The assumed return should represent the expected long-term rate of return, based on UCRP's investment policy. For valuation purposes, the assumed rate of return is 7.50%. As shown below, the actual rate of return on the actuarial value of assets for the 2005-2006 Plan Year was 5.85%.

Since the actual return for the year was less than the assumed return, the Plan experienced an actuarial loss during the year ended June 30, 2006 with regard to its investments, when measured based on the actuarial value of assets. The amount of this loss is derived below.

This chart shows the (loss) due to investment experience.

CHART 9
Investment Experience for Year Ended June 30, 2006

	June 30, 2006
	(\$ in 000s)
1. Actual return on actuarial value of assets	\$2,360,551
2. Average actuarial value of assets	40,348,394
3. Actual rate of return: (1) ÷ (2)	5.85%
4. Assumed rate of return	7.50%
5. Expected return: (2) x (4)	3,026,130
6. Actuarial (loss): (1) – (5)	(\$665,579)

SECTION 2: Valuation Results for the University of California Retirement Plan

In the preceding subsection B we described the actuarial asset valuation method that gradually takes into account fluctuations in the market value rate of return. The effect of this method is to stabilize the actuarial rate of return, which contributes to leveling pension plan costs. This effect is clear in the chart below, where the year-to-year returns on actuarial value are less volatile than the returns on market value.

CHART 10
Market and Actuarial Rates of Return for Years Ended June 30, 1997 - 2006

This chart illustrates how this leveling effect has actually worked over the years 1997 - 2006.

SECTION 2: Valuation Results for the University of California Retirement Plan

Other Experience

There are other differences between the expected and the actual experience that appear when the new valuation is compared with the projections from the previous valuation. These include:

- the extent of turnover among the members,
- retirement experience (earlier or later than expected),
- mortality (more or fewer deaths than expected),
- the number of disability retirements, and
- salary increases different than assumed.

The net loss from this other experience for the year ended June 30, 2006 amounted to \$442 million which is 1.1% of the expected actuarial accrued liability.

SECTION 2: Valuation Results for the University of California Retirement Plan

D. RECOMMENDED CONTRIBUTION

Beginning with the 1990 plan year, the Regents adopted a full funding policy. Under that policy, the University will suspend contributions when the smaller of the market value or actuarial value of plan assets exceeds the lesser of:

- The actuarial accrued liability (including normal cost), or
- 150% of the estimated current liability (including normal cost).

Based on application of the full funding policy, the recommended contributions to the plan are \$0.

The contribution rates as of July 1, 2006 are based on all of the data described in the previous sections, the actuarial assumptions described in Section 4 and the Plan provisions adopted at the time of preparation of the Actuarial Valuation. They include all changes affecting future costs, adopted benefit changes, actuarial gains and losses and changes in the actuarial assumptions.

The chart compares this valuation's recommended contribution with the prior valuation.

CHART 11

Recommended Contribution

	Plan Year Beginning July 1			
	2006 (\$ in 000s)		2005 (\$ in 000s)	
	Amount	% of Payroll	Amount	% of Payroll
1. Normal cost, beginning of year				
a. Non-safety members	\$1,297,558	15.77%	\$1,243,104	15.31%
b. Safety members	<u>7,832</u>	23.72%	<u>6,957</u>	23.00%
c. Total	\$1,305,390	15.81%	\$1,250,061	15.34%
2. Normal cost, adjusted for timing to middle of year				
a. Non-safety members	\$1,345,337	16.35%	\$1,288,878	15.87%
b. Safety members	<u>8,120</u>	24.59%	<u>7,213</u>	23.85%
c. Total	\$1,353,457	16.39%	\$1,296,091	15.90%
3. Full funding limitation*				
a. Actuarial liability basis	0	N/A	0	N/A
b. Current liability basis	9,806,139	N/A	6,216,589	N/A
c. Lesser of 3(a) and 3(b)	0	N/A	0	N/A
4. Recommended contribution, lesser of (2c) and (3c)	0	0.00%	0	0.00%
5. Covered payroll	\$8,258,985		\$8,149,640	

* Details in Exhibit H

Components and Reconciliation of Normal Cost

Chart 12 below details the components of normal cost as of July 1, 2006. Chart 13 shows a reconciliation of the normal cost percentage from July 1, 2005 to July 1, 2006.

CHART 12

Components of Normal Cost as of July 1, 2006

	(\$ in 000s)	% of Payroll
Retirement benefits	\$982,650	11.90%
Withdrawal benefits	117,711	1.43%
Disability benefits	120,728	1.46%
Death benefits	43,006	0.52%
Administrative expenses	41,295	0.50%
Total Normal Cost	\$1,305,390	15.81%

CHART 13

Reconciliation of the Normal Cost from July 1, 2005 to July 1, 2006

	% of Payroll
Normal Cost as of July 1, 2005	15.34%
Change in demographic profile of participants	0.15%
Change due to removal of one year of select and ultimate salary scale	0.32%
Normal Cost as of July 1, 2006	15.81%

E. INFORMATION REQUIRED BY THE GASB

Governmental Accounting Standards Board (GASB) reporting information provides standardized information for comparative purposes of governmental pension plans. The information required is set forth in Governmental Accounting Standards (GAS) 25 and 27. This information allows a reader of the financial statements to compare the funding status of one governmental plan to another on relatively equal terms.

Critical information to GASB is the historical comparison of the GASB required contributions (\$0) to the actual contributions (\$0). This comparison demonstrates whether a plan is being funded on an actuarially sound basis and in accordance with the GASB funding requirements.

The other critical piece of information regarding the Plan's financial status is the funded ratio. This ratio compares the assets of the plan to the liabilities of the plan as calculated under GASB. High ratios indicate a well-funded plan with assets sufficient to pay most benefits. Lower ratios may indicate recent changes to benefit structures, funding of the plan below actuarial requirements, poor asset performance, or a variety of other changes.

The details regarding the calculations of these values and other GASB numbers may be found in Section 4, Exhibits I, II and III.

This graph shows the Plan's funded ratio.

CHART 14
Funded Ratio (Plan Year Beginning July 1)

SECTION 3: Supplemental Information from the Valuation of the University of California Retirement Plan

EXHIBIT I

Section 415 Limitations

Section 415 of the Internal Revenue Code (IRC) specifies the maximum benefits that may be paid to an individual from a defined benefit plan and the maximum amounts that may be allocated each year to an individual's account in a defined contribution plan.

A qualified pension plan may not pay benefits in excess of the Section 415 limits. The ultimate penalty for non-compliance is disqualification: active participants could be taxed on their vested benefits and the IRS may seek to tax the income earned on the plan's assets.

In particular, Section 415(b) of the IRC limits the maximum annual benefit payable at the Normal Retirement Age to a dollar limit indexed for inflation. That limit is \$170,000 for 2005 and \$175,000 for 2006. Normal Retirement Age for these purposes is age 62. These are the limits in simplified terms. They must be adjusted based on each participant's circumstances, form of benefits chosen and after tax contributions.

The University pays benefits in excess of the limits through a 415(m) Restoration Plan.

Legal Counsel's review and interpretation of the law and regulations should be sought on any questions in this regard.

SECTION 3: Supplemental Information from the Valuation of the University of California Retirement Plan

EXHIBIT J

Definitions of Pension Terms

The following list defines certain technical terms for the convenience of the reader:

Assumptions or Actuarial

Assumptions:

The estimates on which the cost of the Plan is calculated including:

- (a) Investment return — the rate of investment yield which the Plan will earn over the long-term future;
- (b) Mortality rates — the death rates of employees and pensioners; life expectancy is based on these rates;
- (c) Retirement rates — the rate or probability of retirement at a given age; and
- (d) Turnover rates — the rates at which employees of various ages are expected to leave employment for reasons other than death, disability, or retirement.

Normal Cost:

The amount required to fund the level cost allocated to the current year of service.

Actuarial Accrued Liability for Actives:

The accumulated value of normal costs allocated to the years before the valuation date.

Actuarial Accrued Liability for Pensioners:

The single sum value of lifetime benefits to existing pensioners. This sum takes account of life expectancies appropriate to the ages of the pensioners and of the interest which the sum is expected to earn before it is entirely paid out in benefits.

Unfunded (Overfunded) Actuarial Accrued Liability:

The extent to which the actuarial accrued liability of the Plan exceeds (or is exceeded by) the assets of the Plan. There is a wide range of approaches to recognizing the unfunded or overfunded actuarial accrued liability, from meeting the interest accrual only to amortizing it over a specific period of time.

SECTION 3: Supplemental Information from the Valuation of the University of California Retirement Plan

**Amortization of the Unfunded
(Overfunded) Actuarial
Accrued Liability:**

Payments made over a period of years equal in value to the Plan's unfunded or overfunded actuarial accrued liability.

Investment Return:

The rate of earnings of the Plan from its investments, including interest, dividends and capital gain and loss adjustments, computed as a percentage of the average value of the fund. For actuarial purposes, the investment return reflects a smoothing of market gains and losses to avoid significant swings in the value of assets from one year to the next.

Current Liability:

The actuarial present value of accumulated plan benefits.

Beneficiary:

Used for statistical purposes only; includes Eligible Survivors, Contingent Annuitants and Spouses/Domestic Partners

Demographic Assumptions

Post – Retirement Mortality Rates:

Healthy: 1994 Group Annuity Reserving Mortality Table unloaded, projected with scale AA to 2002. Ages are set back two years for males (from the male table) and set back one year for females (from the female table).

Disabled: Based upon 1987 Group Long Term Disability Table (composite select and ultimate rates).

Sample Termination Rates Before Retirement:

Age	Rate (%)					
	Healthy Mortality		Disabled Mortality*		Disability Incidence	
	Male	Female	Male	Female	Male	Female
20	0.04	0.03	19.60	15.10	0.14	0.06
25	0.06	0.03	18.18	13.81	0.15	0.08
30	0.08	0.03	11.49	7.88	0.16	0.10
35	0.09	0.04	7.86	5.48	0.18	0.16
40	0.10	0.06	5.26	4.13	0.22	0.26
45	0.13	0.09	3.89	3.15	0.28	0.38
50	0.20	0.12	3.30	2.66	0.37	0.57
55	0.33	0.21	3.02	2.84	0.51	0.80
60	0.60	0.40	3.14	3.75	0.78	1.12
65	1.10	0.79	4.28	5.07	1.24	1.45

* Assumed to apply only while receiving a disability benefit.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

**Retirement Age and Benefit
for Deferred Vested Members:**

Deferred vested members are assumed to retire at age 50.

Form of Payment:

Life annuity for single members;
25% contingent annuity for members with Social Security in a relationship for at least one year;
50% contingent annuity for members without Social Security in a relationship for at least one year;
50% contingent annuity for Safety members in a relationship for at least one year.

Future Benefit Accruals:

1.0 year of service per year for the full-time employees. Part-time employees are assumed to earn full-time service for all future years.

Definition of Active Members:

All members of UCRP who are not separated from active employment as of the valuation date or have not started receiving a monthly pension on or before the valuation date.

The results of this valuation include liabilities even for members who have elected to transfer to the LANS defined benefit plan. These members are still valued as active UCRP members and their liabilities are shown as active in the results.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Percent with Eligible Dependents (Samples):

Age	Male	Female
20	58.00%	66.50%
25	85.00	89.50
30	91.50	92.50
35	93.00	94.00
40	93.50	93.50
45	94.00	92.50
50	95.00	91.00
55	94.50	89.00
60	94.00	85.00
65	93.00	80.00

Spouse/Domestic Partner Ages: Members assumed to have an opposite sex spouse or domestic partner, with females three years younger than males.

Number of Dependents (Samples):

Age	Number of Eligible Dependents per Active Member with Dependents	
	Male	Female
20	1.0	1.0
25	1.8	2.3
30	2.3	3.2
35	3.0	3.1
40	3.5	2.5
45	3.0	2.0
50	2.5	1.5
55	2.0	1.3
60	1.5	1.1
65	1.3	1.1

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Economic Assumptions

Net Investment Return: 7.50% (including 4.00% for inflation)

Consumer Price Index: Increase of 4.00% per year.

Salary Increases (Samples):

<u>Annual Rate of Compensation Increase</u>	
The sum of 4.00% inflation (at all ages) plus the following Merit and Longevity increases:	
<u>Age</u>	
20	2.50%
25	2.50%
30	2.10%
35	1.70%
40	1.50%
45	1.30%
50	1.20%
55	1.10%
60	0.90%

The assumed salary increases will be 2.0% lower overall for the period July 1, 2006 through June 30, 2007.

Administrative Expenses: 0.5% of payroll added to normal cost.

Actuarial Methods

Actuarial Value of Assets: The market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual and the expected returns on a market value basis and is recognized over a five-year period.

Actuarial Cost Method: Entry Age Normal Actuarial Cost Method. Entry Age is calculated as the valuation date minus years of service. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are allocated by salaries, as if the current benefit accrual rate has always been in effect.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Other Actuarial Assumptions

Lump Sum Assumptions:

<i>Discount Rate:</i>	7.50%
<i>COLA:</i>	2.00%
<i>Take-rate:</i>	None assumed.
<i>Mortality:</i>	1994 Group Annuity Reserving Mortality Table unloaded for males set back three years, projected with scale AA to 2002.

Approximations:

<i>Guaranteed Survivor and Disability Benefits</i>	Liability and normal cost for guaranteed survivor and disability benefits for members who elected Social Security was estimated as 10% of their basic liability and normal cost.
<i>Sick Leave</i>	Service has been increased by 0.2% for faculty, 1.4% for staff, and 2.5% for safety members to account for unused sick leave.

Changes in Assumptions:

There have been no changes in actuarial assumptions since the previous valuation.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

EXHIBIT V

Summary of Plan Provisions

This exhibit summarizes the major provisions of the Plan included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Effective Date:	April 24, 1954. Includes amendments through July 1, 2006.
Covered Employees:	Generally all employees who are not members of another retirement system to which the Regents contribute, and who: a. Are appointed to work 50% time or more for one year or longer or b. Have generally accumulated at least 1,000 hours in a 12-month period.
Highest Average Plan Compensation (HAPC):	Highest average monthly full-time-equivalent base compensation rate received during any period of 36 consecutive months.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Age Factor:	Percentage of HAPC per year of service credit (interpolated for fractional ages).			
<i>Nonsafety Members</i>				
	Age	Factor	Age	Factor
	50	1.10%	56	1.94%
	51	1.24	57	2.08
	52	1.38	58	2.22
	53	1.52	59	2.36
	54	1.66	60+	2.50
	55	1.80		
<i>Safety Members</i>	3.0% at all ages 50 and above.			
<i>Tier II Members</i>	Equal to one-half of the Age Factor for Nonsafety Members.			
Benefit Percentage:	Age Factor multiplied by years of service credit; not to exceed 100%.			

Basic Retirement Income (BRI):

- Members without Social Security* Benefit Percentage x HAPC.
- Members with Social Security* Benefit Percentage x HAPC in excess of \$133 per month.
- Safety Members* Benefit Percentage x HAPC.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Service Retirement:

<i>Eligibility</i>	Age 50 with 5 years of service credit, or Age 62 regardless of service credit if membership began on or before July 1, 1989, or Retirement on Normal Retirement Date.
<i>Benefit</i>	BRI.
<i>Form of Payment</i>	Single Life Annuity.
<i>Payment Options</i>	Full continuance to contingent annuitant; two-thirds continuance to contingent annuitant; one-half continuance to contingent annuitant; one-half continuance (including post-retirement survivor continuance) to surviving spouse or domestic partner (for members with Social Security only).
<i>Lump Sum Cashout</i>	May be elected in lieu of monthly retirement income.

Temporary Social Security Supplement:

<i>Eligibility</i>	For members with Social Security only and retirement must occur before age 65.
<i>Benefit</i>	Temporary annuity payable to age 65 in the amount of \$133 per month multiplied by Benefit Percentage.
<i>Form of Payment</i>	Single Life Annuity.
<i>Payment Options</i>	None.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Disability:

<i>Eligibility</i>	Disablement after five years of service credit; safety members are eligible for duty disability without regard to years of service credit. Service credit continues to accrue during disabled period.
<i>Benefit</i>	
<i>Member without Social Security</i>	25% of final salary, plus 5% of final salary per year of service credit greater than two, total not to exceed 40% of final salary, plus 5% of final salary for each eligible child, total not to exceed 20% of final salary.
<i>Member with Social Security</i>	15% of final salary, plus 2.5% of final salary per year of service credit greater than two, total not to exceed 40% of final salary, less \$106.40 per month.
<i>Safety Members(Non-duty)</i>	Same as for members without Social Security; includes eligible child's benefit.
<i>Safety Members(Duty)</i>	50% of HAPC, or non-duty disability benefit if greater.
<i>Form of Payment</i>	Single life annuity payable until end of disability income period or retirement date if earlier.
<i>Disability Income Period</i>	
<i>Members disabled before November 5, 1990</i>	To earliest of: Date member is eligible to retire and retirement income equals or exceeds disability income; Age 62 (age 67 for members without Social Security); or Date member retires.
<i>Members disabled on or after November 5, 1990</i>	If under age 65 at disablement: Members with Social Security: to age 65 or five years if longer. Members without Social Security: to age 67 or five years if longer. If age 65 or older at disablement: to age 70 or 12 months if longer. Disability income ends if member is no longer disabled.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Vested Termination:

<i>Eligibility</i>	Five years of service credit, or age 62 regardless of service credit if membership began on or before July 1, 1989.
<i>Benefit</i>	BRI beginning at age 50 or later, calculated using HAPC at termination date, adjusting for CPI changes (see Cost-of-Living Adjustment), and benefit formula in effect when benefits commence.
<i>Form of Payment</i>	As for retirement.
<i>Payment Options</i>	As for retirement.
<i>Refund Option</i>	Member may elect a refund of contributions with interest, thereby forfeiting all other benefits.
<i>Lump Sum Cashout</i>	May be elected in lieu of retirement income, available only if at least age 50 with five years service credit at date of termination.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Pre-retirement Survivor Income:

Eligibility Eligible survivor of deceased active or disabled member with two or more years of service credit; no service requirement for duty-related death of Safety member.

Benefit

Member without Social Security

Percent of final salary as follows:

<u>Eligible Survivors</u>	<u>Percent</u>	<u>Minimum Benefit</u>
1	25%	\$200
2	35	\$300
3	40	\$300 plus 5% of final salary
4	45	\$300 plus 10% of final salary
5+	50	\$300 plus 15% of final salary

Member with Social Security 25% of final salary less \$106.40 per month.

Safety Members, non-duty death As for members without Social Security.

Safety Members, duty death Percentage of HAPC as follows, but not less than benefit for non-duty death.

<u>Eligible Survivors</u>	<u>Percent of HAPC</u>
1	50.0%
2	62.5
3	70.0
4+	75.0

Death while eligible to retire

Eligibility Eligible surviving spouse or domestic partner of active, disabled or inactive member who dies while eligible to retire.

Benefit Greater of benefit described above or monthly benefit to surviving spouse or domestic partner assuming member had retired on date of death and elected full continuance option with spouse or domestic partner as contingent annuitant.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Post-retirement Survivor Continuance:

<i>Eligibility</i>	Eligible survivor of deceased retired member.
<i>Benefit</i>	
<i>Member without Social Security</i>	50% of BRI including COLA.
<i>Member with Social Security</i>	25% of BRI including COLA, plus 25% of Temporary Social Security Supplement (ends when member would have reached age 65).
<i>Safety Members</i>	50% of BRI including COLA.

Lump Sum Death Benefit:

<i>Eligibility</i>	Active, inactive, disabled, or retired member.
<i>Basic Benefit</i>	
<i>Active member who became a member before October 1, 1990</i>	Greater of : \$1,500 plus one month's final salary, or \$7,500.
<i>All others</i>	\$7,500
<i>Residual Benefit</i>	Refund of member contributions plus interest, reduced by a portion of benefits received (100% of retirement income, 50% of pre-retirement survivor income or disability income) payable to beneficiary if no survivor, surviving spouse, domestic partner, or contingent annuitant.

Normal Retirement Date: Attainment of age 60 with five years of service credit.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Eligible Survivor:

*Eligible Spouse or
Domestic Partner*

Spouse or domestic partner of deceased active or disabled member in relationship for at least one year before date of death and who is:

Responsible for care of eligible child, disabled, or age 60 (age 50 if spouse of member without Social Security and in Plan prior to October 19, 1973).

Eligible Child

Child that is either under age 18, under age 22 and full-time student, or disabled, if disability occurred prior to age 18 or age 22 if a full-time student.

Eligible Dependent Parent

Parent of deceased active, disabled or retired member, supported by 50% or more by member for one year prior to earliest of death, disablement or retirement.

Inactive Member:

Former UCRP member who retains right to vested benefits.

Cost-of-Living Adjustment:

Basic

100% of annual Consumer Price Index (CPI) increase up to 2% per year.

Supplemental

Greater of: 75% of annual CPI increase above 4%, or accumulated increment.

Accumulated increment: 2% compounded annually from the member's COLA eligibility date through the current date, less 2%.

The sum of the Basic and Supplemental COLA's cannot exceed 6% in a year.

COLA applies to:

*Retired members, survivors,
disabled members, and
contingent annuitants receiving
retirement income*

Benefits in pay status one or more years on July 1.

Inactive members

HAPC (used to calculate retirement income) adjusted for COLA up to 2% per year from separation date to retirement date; retirement income adjusted using COLA formula.

*Disabled members receiving
disability income since before
November 5, 1990*

HAPC (used to calculate retirement income) adjusted for COLA up to COLA formula above for years from disablement to retirement date.

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Capital Accumulation Provision(CAP):

<i>Eligibility</i>	Active member on specified date; benefits immediately vested.
<i>Allocation Dates</i>	
<i>April 1, 1992</i>	Active member from December 31, 1991 through April 1, 1992: 5.0% of 1991 calendar year covered compensation.
<i>July 1, 1992</i>	Active member on July 1, 1992: 2.5% of 1991-1992 fiscal year covered compensation.
<i>July 1, 1993</i>	Active member on July 1, 1993: 2.5% of 1992-1993 fiscal year covered compensation.
<i>November 1, 1993</i>	Active member on October 1, 1993 and subject to 1993-1994 salary plan: 5.26% of July through October 1993 covered compensation. Not applicable for laboratory members.
<i>July 1, 1994</i>	Active member on June 1, 1994 and subject to 1993-1994 salary plan: 2.67% of November 1993 through June 1994 covered compensation. Not applicable for laboratory members.
<i>May 1, 2002</i>	Active member on April 1, 2002: 3.0% of April 2001 through March 2002 covered compensation.
<i>May 1, 2003</i>	Active member on April 1, 2003: 5.0% of April 2002 through March 2003 covered compensation.
<i>Interest Credit</i>	Regent's approved interest rate; currently 8.5% per year for pre-2002 CAPs and 7.5% for 2002 and later CAPs (CAP II).
<i>Payment</i>	Lump sum payment upon termination, retirement or death.

University Contributions:

Determined by the Entry-Age Normal Cost method. Beginning with the 1990 plan year, the Regents adopted a full funding policy. Under that policy, the University will suspend contributions when the smaller of the market value or the actuarial value of plan assets exceeds the lesser of:

The actuarial accrued liability (including normal cost), or
150% of the estimated current liability (including normal cost).

SECTION 4: Reporting Information from the Valuation of the University of California Retirement Plan

Member Contributions:	Member contributions are currently being redirected to the UC Defined Contribution Plan.
<i>Members without Social Security</i>	3.0% of covered compensation, less \$19 per month.
<i>Members with Social Security</i>	2.0% of covered compensation up to the Social Security wage base, plus 4.0% of excess covered compensation, minus \$19 per month.
<i>Safety Members</i>	3.0% of covered compensation, less \$19 per month.
<i>Interest Credit</i>	Regent's approved interest rate; currently 6.0% per year.
Changes in Plan Provisions:	<p>There have been no changes in plan provisions since the last valuation that have a material impact on Plan liabilities and normal cost.</p> <p>Active members at the Los Alamos National Laboratory made an election to either become inactive in UCRP or to transfer to a defined benefit plan that begins effective June 1, 2006 for the Los Alamos National Security LLC (LANS). This valuation includes results reflecting the LANL transfer elections. However, it does not reflect the actual transfer of assets and liabilities to the LANS defined benefit plan. This means that the results of this valuation include liabilities even for members who have elected to transfer to the LANS defined benefit plan. These members are still valued as active UCRP members and their UCRP liabilities are shown as active in the results. LANL members who elected not to transfer to the LANS defined benefit plan are included in the valuation results either as terminated vested or nonvested members, or as retired members if they have retired by July 1, 2006.</p>

199687v2/05693.001
